

## A World of Payments... A World of Possibilities

The markets of the world are open for business. Open your business to the world by accepting payments in multiple currencies.

Whether you've already entered the global commerce arena or you are contemplating expanding your boundaries, you'll need a payment partner that can help you interpret regulatory challenges and understand the range of solutions you need to reach millions of new customers.

Chase Paymentech is the only partner you'll need to grow your business internationally. We offer multiple currency and settlement options, prompt access to funds and easy account reconciliation, all supported on our network with an unmatched record of virtually 100% uptime. The same world-class account service model and comprehensive reporting and data management solutions we've perfected in the U.S. backs our international product suite. Let us help you expand the boundaries of your business.

### A Range of Options for a Range of Currencies

We recognize payment needs vary around the world and that's why we have three separate options to service our clients.

- **Multi Currency** – Accept card payments and receive funds in up to 13 currencies covering North America, Europe and many Asian countries. With this scenario, neither the merchant nor cardholder incurs any foreign exchange impact risk or expense.
- **Cross Currency** – If you want to consolidate treasury operations or sell to cardholders around the globe, this service is ideal. You can accept payments in more than 130 currencies and get paid in up to 12 major settlement currencies, plus eliminate the hassle of managing the foreign exchange.\* Plus, your customers will appreciate paying in their preferred currency.
- **Direct Debit** – Many non-U.S. consumers prefer to pay by methods other than credit or debit cards, especially for recurring payments. Direct Debit presented by Chase Paymentech is available in six countries: Germany, the U.K., Austria, France, Belgium and the Netherlands. Consumers are debited and merchants are paid in the same local currency. Neither the merchant nor cardholder incurs any foreign exchange risk or expense.

\*Merchant domicile determines settlement currency availability

### Advantages

- Reach customers around the globe
- Simplify reconciliation with consolidated reporting
- Manage one relationship and interface

## Multiple Currency Choices from a Single Service Relationship

When you consolidate your payments activity with Chase Paymentech, you eliminate the costs and challenges of managing multiple payment provider relationships and connections. Whichever service you select, or even if you deploy multiple solutions, you will experience our seamless front end processing and backend reporting consistently across all your currencies and payment methods.

When you eliminate foreign exchange hassles and simplify the reconciliation process, you'll save both money and time. In addition, our end-to-end solution provides you with:

- Single processing interface
- Online and batch processing with fast response times
- Online, catalog and recurring payments solutions
- Consolidated cash management for multi-currency bank accounts
- Rapid local funds availability

## Experience and Expertise for the New World Economy

Chase Paymentech leads the world in understanding the complex challenges and lucrative opportunities of global payments processing. For nearly two decades, we've helped more than 500 clients, including many of the world's most recognizable brands, expand their presence around the globe.

We have a proven track record of dependable, secure systems that our clients count on to simplify processing, exceptions and cash management activities and accurately reconcile international business.

From traditional card payments to direct debit transaction processing, Chase Paymentech is the global provider of choice for the leaders of the world's commerce. We can help you operate in profitable new markets—quickly, simply and accurately.

- Valuable insight and consultation related to payments management
- Leading edge payment alternatives to support your customers' preferences
- Comprehensive online financial reporting and chargeback management tools
- Timely and accurate solutions to your service and support needs

## About Chase Paymentech

Chase Paymentech is the world's premier financial transaction processor for businesses accepting payments via traditional point of sale, hospitality, Internet, catalog and recurring billing methods. An end-to-end processor for merchants of all sizes and industries, in 2006 we processed more than 18 billion transactions valued at approximately \$660 billion USD.

Chase Paymentech serves merchants from offices in Dallas, TX, Toronto, Canada and Dublin, Ireland.

## Case in Point: Match.com

To keep up with the extraordinary demand for the company's services, Match.com required a payment processing partner that could support their international presence and high recurring transaction volume.

Match.com also required a provider with the technology and processes in place to overcome the unique security and fraud challenges that web-based, card-not-present bankcard transactions can pose.

With an improved view of card-based payments and the ability to accept payments from virtually any country, Match.com has been able to chart its growth strategy with greater confidence. Fraud is mitigated and processing costs are kept low.
